

# VoltVibe Return Merchandise Authorization (RMA) & Restocking Fee Policy

## 1. General Returns and Merchandise Authorization (RMA)

VoltVibe offers a 30-day return window starting from the documented carrier delivery date. Before shipping any returns back to a VoltVibe processing warehouse, customers must obtain a Return Merchandise Authorization (RMA) number from the VoltVibe Support Desk. Packages returned without a visible RMA number printed on the outer shipping label will be rejected at the receiving dock and returned to sender at their expense. To qualify for a return, the product must be packaged in its original manufacturer packaging and contain all accessories, literature, manuals, charging blocks, and cables originally included in the shipment. Returns must be initiated and sent back to our regional warehouse in Salt Lake City, Utah, for final physical QA inspection.

## 2. Restocking Fee Schedule & Tiers

To offset warehouse processing, cleaning, sanitization, and packaging replacement costs, VoltVibe applies restocking fees based on the physical condition of the returned item and its packaging. Fees are categorized into four distinct tiers:

| Condition Category                   | Restocking Fee % | Return Eligibility & Policy Details                                 |
|--------------------------------------|------------------|---------------------------------------------------------------------|
| Unopened / Factory Sealed (New)      | 0% Fee           | Eligible for 100% refund to original payment method.                |
| Opened Brand New Hardware            | 10% Fee          | Original packaging opened but zero signs of usage or physical wear. |
| Refurbished Items (Grade A/B)        | 10% Fee          | Must match original diagnostic serial numbers (VRID). See doc_09.   |
| Damaged Casing / Missing Accessories | 20% Fee          | Applies if cables, chargers, or manual leaflets are missing.        |
| Refurbished Items (Grade C/Outlet)   | Non-Returnable   | Final sale. No refund or store credit. Under statutory exclusions.  |

### 2.1 Technical Evaluation and Validation Protocol

Upon receipt at our Salt Lake City intake depot, returns are logged and routed to technical verification. The receiving team inspects security seals, checks the casing under high-resolution cameras for cosmetic wear, and runs automated serialization checks to match internal firmware identifiers. If a return is classified as Tier 4 (Damaged Casing or Missing Accessories), the 20% fee is strictly applied to cover component replacements. If crucial core components are missing (such as the main control board or internal battery modules), the return is rejected, no refund is issued, and the customer must pay a \$25 shipping fee to retrieve their non-functional device.

## 3. Exemptions and Special Return Scenarios

Certain exclusions apply to standard restocking fees based on the nature of the transaction or product status:

### 3.1 Dead on Arrival (DOA) Exemption Rule

If a product exhibits hardware manufacturing defects out of the box (Dead on Arrival), the restocking fee is fully waived, provided the customer reports the defect within 14 calendar days of delivery. VoltVibe will issue a pre-paid shipping label for return transit. Once our engineering team confirms the manufacturing defect, the customer can choose between a

brand-new replacement unit or a 100% refund. If the defect is reported *after* the 14-day window (but within the 12-month warranty outlined in doc\_01), the restocking fee waiver no longer applies to refunds, and the customer is routed strictly through the standard repair/replacement track.

### ***3.2 Gift Card and Store Credit Payout Deductions***

**CRITICAL ALLOCATION RULE:** For orders purchased using a combination of a VoltVibe Gift Card (as governed by doc\_04\_gift\_card\_terms.pdf) and a standard credit/debit card, restocking fee deductions are allocated sequentially. The restocking fee is first deducted from the credit/debit card refund amount. If the restocking fee exceeds the total amount charged to the credit card, the remaining fee balance is deducted from the gift card refund portion. The gift card portion is refunded strictly as non-transferable VoltVibe Store Credit with a 90-day expiration limit. Under no circumstances will restocking fees be waived for orders leveraging split-payment structures.

## **4. Regional Restocking Regulations**

Restocking fees are subject to local statutory consumer laws and regulations which may override standard company policies:

### ***4.1 California Disclosure Compliancy Rule***

In the State of California, restocking fees are only enforceable if they are clearly disclosed to the customer prior to purchase. Under California Civil Code Section 1723, online retailers must explicitly disclose restocking fees at checkout in a font size no smaller than 10-point, bolded. If a customer demonstrates that the checkout page failed to display this information due to localized rendering errors or mobile layout scaling issues, the restocking fee will be waived upon review by our compliance department.

### ***4.2 European Union (EEA) Exemption***

For customers residing in the European Economic Area (EEA), restocking fees are prohibited for standard returns initiated within the 14-day statutory right of withdrawal (cooling-off period). This exemption does not apply if the customer returns goods that show signs of usage beyond what is necessary to establish the nature, characteristics, and functioning of the goods. If the returned goods show physical wear or damage, VoltVibe reserves the right to deduct a diminished value charge equivalent to the depreciation of the item.
