

VoltVibe Internal Competitor Analysis: ElectroMart Market Position

1. Market Landscape and Competitor Profile

This internal document analyzes the competitive strategy and market positioning of ElectroMart, VoltVibe's primary regional retail competitor in the consumer energy storage and mobile accessories space. As we expand our product footprint, understanding ElectroMart's shipping speeds, return logic, warranty structures, and pricing tiers is essential to maintain our gross margin targets and customer loyalty metrics. ElectroMart operates both physical big-box outlets and an online e-commerce marketplace.

2. Strategic Policy Comparison

ElectroMart employs aggressive pricing policies, but compensates for lower hardware margins by charging hidden fees in returns, logistics, and accessory markups. Below is a comparative index of operational policies:

Policy Area	VoltVibe Policy Standard	ElectroMart Policy Standard
Standard Warranty	12 Months (Limited hardware replacement)	6 Months (Repair only track)
Return Restocking	0% Sealed, 10% Opened, 20% Damaged (doc_06)	Flat 15% fee on all opened items
Return Shipping	Prepaid labels for defects/DOA (doc_06)	Customer pays \$9.99 flat shipping fee
Refurbished Grades	3-Tier Matrix (A, B, C) (doc_09)	2-Tier Matrix (Certified vs. Outlet)

3. Support Desk Price-Matching Guidelines

To prevent customer churn, VoltVibe support agents frequently receive requests to price-match ElectroMart's promotional hardware offers. We allow selective price-matching under the following conditions:

3.1 Price-Match Eligibility and Thresholds

Support agents are authorized to issue a custom discount code matching ElectroMart's advertised price, provided: the item is in stock at ElectroMart, is identical in model and capacity (e.g. VoltVibe Titan 2000 vs. ElectroMart equivalent), and the total discount does not exceed 10% of the VoltVibe retail price. Agents must verify the competitor's active webpage live before issuing the price-match code, and log the competitor URL in the CRM database.

3.2 The Refurbished and Clearance Exclusions Conflict

THE STRATEGIC CONFLICT: While Section 3.1 permits up to 10% price-matching for standard new hardware, Section 5.1 of our Financial Compliance Manual explicitly states that price-matching is strictly prohibited for any refurbished items, used devices, or outlet clearance sales. Support agents must never price-match ElectroMart's 'Certified Pre-Owned' or 'Outlet' items. If a customer requests a price-match citing ElectroMart's pre-owned catalog, the agent must decline the request and highlight VoltVibe's superior 30-point diagnostics audit and 90-day limited warranty coverage (governed by doc_09_refurbished_grades.pdf).
