

VoltVibe Order Cancellation and Modification Policy

Effective Date: January 1, 2026

To ensure rapid delivery, VoltVibe processes all online orders through our automated fulfillment centers immediately upon placement. Consequently, the window of time for modifying or canceling an order is strictly limited. Customers may cancel or modify an order (including changing shipping addresses, updating payment options, or adding/removing products) within exactly 45 minutes of the order placement timestamp.

To cancel or change your order within this 45-minute window, log into your account, navigate to the "Order History" section, select the pending order, and click the "Modify Order" or "Cancel Order" button. Alternatively, you can contact support immediately via live chat. Once this 45-minute window has elapsed, the order is locked for packaging and shipment, and no modifications or cancellations can be made under any circumstances. In such cases, customers must wait to receive the shipment and then initiate a standard return process.
