

VoltVibe Investor Relations: Third Quarter 2024 Earnings Call Transcript

Date: November 6, 2024

CEO Opening Remarks:

"Good afternoon, everyone. Today we are pleased to report strong financial performance for VoltVibe during the third quarter of 2024. Our total revenue reached \$48.2 million, representing an 11% increase year-over-year. This growth was driven primarily by expansion in our mobile computing category. Our adjusted EBITDA margin expanded to 8.4%, reflecting improved supply chain logistics and fulfillment center efficiencies. Looking ahead to the holiday season, we are scaling our automated inventory tracking to mitigate warehousing bottlenecks and expect continued margin improvements."
