

VoltVibe Corporate Safety: Emergency Fire Drill and Building Evacuation Protocols

Effective Date: July 2025

This protocol applies to all staff, contractors, and visitors at the VoltVibe Corporate HQ building. In the event of an emergency or fire alarm:

1. Evacuation: Leave the building immediately using the nearest exit staircases (Stairwell A and B). Do not use the elevators.
2. Wardens: Designated Floor Safety Wardens wearing bright green vests will inspect offices, meeting rooms, and restrooms to ensure complete evacuation.
3. Assembly Point: Assemble at the designated muster area in the parking lot behind Building C, at least 150 feet from the structures. Do not re-enter the building until the facilities team issues an official "all clear".
